Scientist in Plant Pathology
**Club Root-a disease of
concern for Alberta's
canola industry**

About JEDI's Annual AG Forum

As in many areas of our great province, agriculture plays a vital roll in the JEDI region. The region covers a vast 3,324.87 square-kilometres (821,593 acres) of rich and fertile agricultural land and is both a major producer of grain and livestock. Like many rural areas of Alberta agriculture is truly the “heartbeat” of our community.

In an effort to give back to the hardworking agriculture community, JEDI is proud to host an annual Ag Forum. This year the Forum is a full day event scheduled for Thursday, November 21, 2019 at the Best Western Wayside Inn in Wetaskiwin starting at 9:00 a.m. The forum is a free event that is geared towards addressing the operational needs of our regional farmers with a focus on grain and livestock operations.

Great Event! Job well done! Very informative, good speakers." - 2018 Ag Forum Attendee

Key Note Speaker **ROBERTSAIK**

Food 5.0- How We Feed The Future

During his presentation Rob takes you on a journey from the “muscle era” of farming to a future where the convergence of new technologies like sensors, robotics, and machine learning make infinite sustainability achievable. With the veil lifted on modern agriculture practices, you’ll be inspired to contribute to a culture where farmers can adopt the science and tools, they need to carry out their mission of feeding the planet.

Rob's book FOOD 5.0 was released in August of 2019 & will be available for purchase at the event.
